Experience

Website: ischool.work / August 2020

Designed and prototyped, using UX/UI techniques, a working job-board site that will be used by employers to hire future Bachelor of Information students at UofT.

Accessibility at TD Bank / Sept 2020 - Current

I am currently team lead and lead UX designer on a project tasked with designing and eventually implementing a mobile and kiosk service, at TD Bank branches across Canada, that will queue incoming customers based on their specific needs, focusing especially on persons with disabilities.

FDM Hackathon, 1st place / June 2018

Designed and implemented an algorithm, focused on finite state machines, that instructed a robot to navigate a maze.

The Math Guru, Tutor / Oct 2017 - Current

Tutor math and various programming languages to students, while collaborating with their parents or teachers to assess each of their specific needs and provide a personalized tutoring session.

Education

University of Toronto:

Bachelor of Information / Current

After studying computer science for two years, I am currently pursuing the Bachelor of Information program which focuses on the intersection of computer and social sciences, specifically user-experience and interface design.

Skills

Design Skills: Adobe Illustrator, Photoshop, Wireframing, Figma, Prototyping, Usability Testing, and heuristic evaluations.

Development Skills: Java, Python, C, web development, HTML CSS, and Google Firebase.
